

An attractive characteristic of PE100 piping systems is the creation of leak-free joints through heat fusion, which creates a joint that is as strong as the rest of the pipe. Ensuring on fulfilling the needs of the local potable water pipe market, for generations to come.

Benefits of iMPACT 100®:

-  **Corrosion resistant**
 ✓ No external protection systems required
-  **Virtually leak-free due to welded joints**
 ✓ Lowest leakage rate of any pipe material

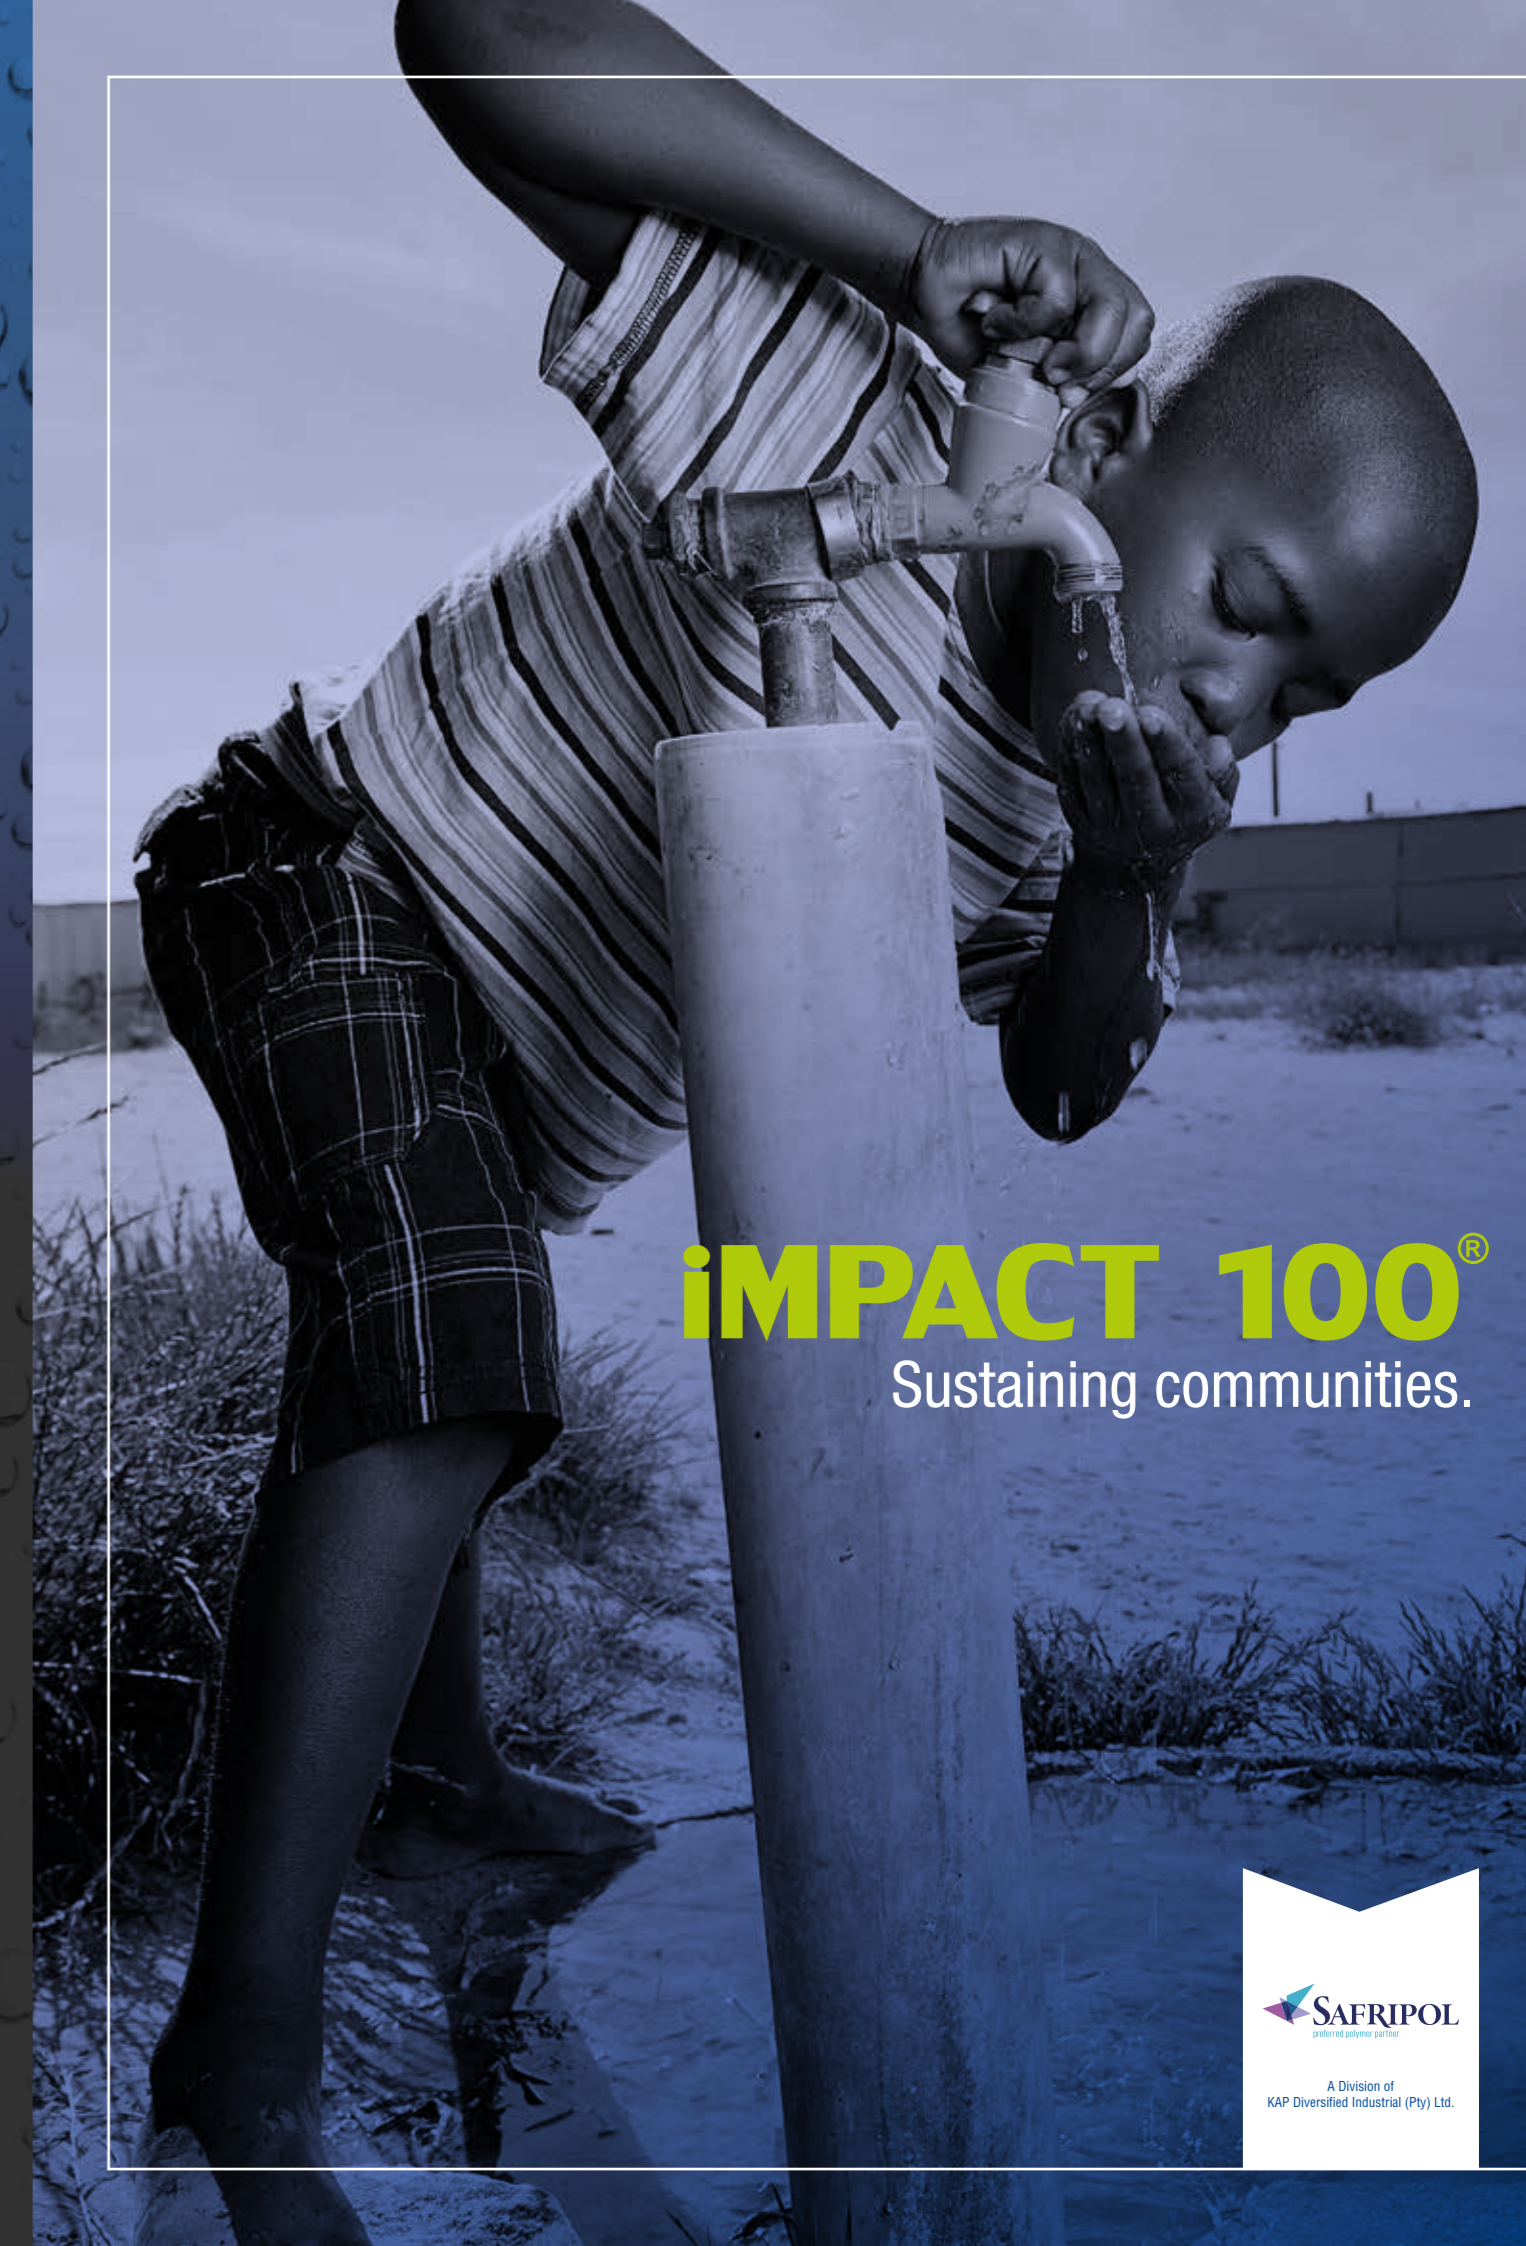

UKWIR Water Mains National Failure Database

-  **Excellent flow characteristics for lifetime of pipe**
 ✓ Superior chemical resistance
 ✓ Resistant to microbial growth
-  **Lightweight and flexible – easy to handle**
 ✓ Lengths or coils
-  **Ductile and tough**
 ✓ Resists external soil loads and internal water hammer/pressure surge
-  **Life expectancy of 50 years minimum**
-  **Manufactured according to SANS 4427:2008**
